Class I	\$25	0.25%

How did the Fund perform during the reporting period?

The primary detractor of the Fund's relative performance during 2024 was Duration. The Fund maintained a duration approximately 0.5 years longer than its benchmark, which was a drag on relative performance particularly in the 4th quarter as interest rates rose sharply. The Fund's Yield curve structure was an additional drag on relative performance, as the Fund's intermediate key rate duration was disproportionately impacted as the intermediate part of the yield curve underperformed. The impact of rising interest rates was somewhat offset by the Fund's overweight to corporate bonds. Despite mixed economic data, corporate credit spreads tightened 19 bps on the year, which benefited the Fund's relative performance.

How has the Fund performed over the last ten years?

Average Annual Total Returns

	1 Year	5 Years	10 Years
